Enhanced digital presence and app of Acelerion.

Solution

The Acelerion app design was built to focus on clarity, helping stakeholders adopt the tool with minimal learning curve, ultimately improving efficiency and accelerating deal closures across departments. With the creation of a new friendly branding, we introduced vibrant green tones and character illustrations. Finally, it all came to life on the new web design.

Acelerion

Purpose-built product redesign of Induwallet.

Solution

The UX design strategically addressed user inefficiencies by rethinking key customer journeys. Features like balance overviews and action-required notifications were redesigned to surface critical information faster, reducing decision-making time. The updated UI design includes custom iconography and light colours, focusing on clarity and usability.

Finance-focused app design for Clever Finance.

Solution

The design of this wallet application was created with a goal to show how day-to-day finance management can be easily simplified. The mobile and desktop interfaces were designed simultaneously to ensure seamless consistency across devices, integrating interactive graphs, detailed expense breakdowns, and actionable insights.

New crypto casino brand and user interface for BitRoyale.

Solution

By creating a cohesive branding enriched with custom 3D illustrations, we developed a visual language that stands out in iGaming market. This approach enabled us to highlight the elements that engage iGaming users the most, resulting in user-friendly interfaces. We also infused BitRoyale unique style into popular iGaming games, ensuring the platform is both visually captivating and easy to navigate.

Space-themed brand and web design for SpacyBet.

Solution

Transformation of SpacyBet was done by incorporating dynamic animations and cosmic visuals that create an immersive gaming environment. We focused on interactive design elements, enhanced user engagement and made the platform more entertaining. We also strengthened SpacyBet brand identity by integrating consistent space themed motifs. Our redesign resulted in a unique and captivating UX that keeps players returning for more.

Fresh and engaging design of CS2 unboxing site CS2ROLL.

Solution

We've been challenged to come up with entertaining visuals to engage with gaming community. After creating a clean design system we created a modern interface that makes buying, selling, and trading skins easier than ever. Our approach ensured the site is both attractive and straightforward to navigate, chat or play.
